SKILLS

`Java` `Angular 4+` `Vue.js` `C` `SpringBoot`
`HTML & CSS` `Git & Github` `Jira` `Heroku`
`IBM Clearcase` `MySQL` `Firebase Database`
`ServiceNow` `Postman`

PERSONAL PROJECTS

E-COMMERCE APPLICATION IN VUE.JS (SHOPIN-IO) (06/2021 - Present)

- This is a sample ecommerce application built using vue.js and firebase authentication and firestore database + storage and deployed on Heroku.
- I am building a full-scale ecommerce application which can be used by businesses (small/large) to develop and launch their own online store.
- It used Vue.js and Firebase
- URL: https://shopin-io.herokuapp.com
- Code: https://github.com/nishchay7pixels/ecommerce_vue

GATEMULATOR (08/2020 - 09/2020)

- It is an emulator for GATE Examination where users may practice mock tests and work on their answering strategies, time management and assessment criteria which will develop self confidence.
- It used Angular, Angular Material Design

LEXCOVID-19 (03/2020 - 03/2020)

- Covid-19 Tracker for India to fetch and display stats including current cases, total cases, active cases, and other information.
- It used Angular, COVID-19 API India/Global, COVID-19 Map Visualization, VMWare Clarity Design
- Code : https://github.com/nishchay7pixels/LexCovid19
